09:45 – 10:00

Introduction to Rubrik

Why Rubrik is the partner of choice to deliver the right protection at the right scale.

Delivered by

Sean Mulgrew

SE Manager UK&I, Rubrik

10:00 – 10:15

Introduction to Palo Alto Networks XSOAR

No longer can organisations rely on point based, siloed security solutions to provide the relevant security protection required. The integration of such controls and technologies is paramount in both the enhancement of an organisation's security posture but also in the overall ROI that has been made in those technologies.

In this specific presentation we will be highlighting how two separate but partner based technologies (Rubrik Polaris & Cortex XSOAR) can be easily and tightly integrated enabling security teams to leverage the new enhanced integrated capabilities. The integration of the two technologies re-emphasises the concept of security defence in depth.

Delivered by

Paul Bertenshaw

SE Specialist Cortex, Palo Alto Networks

10:15 – 10:30

Demo

Demo on the integration and the value it brings to Education.

10:30 – 10:45
